INFOTAINMENT

DISPLAY AUDIO

New for the 2021 model the HR-V offers the latest in smartphone connectivity, allowing you to seamlessly integrate either Apple or Android devices with the Advanced Display Audio Unit. Apple CarPlay™ with Siri Eyes is a smarter, safer and more fun way to use your iPhone in the car. It offers easy navigation and extensive audio and communication capabilities, all while you keep your eyes safely on the road. Use Apple's highly intelligent Siri voice assistant to get directions, make calls, send and receive messages, and select your favourite music. Android Auto™ with Google Voice allows you to quickly connect your compatible smartphone for navigation, communications, music and more. By extending the Android platform in a way that's purpose built for the car, Android Auto is designed as powerful voice actions, with safety in mind.

USER FRIENDLY CONTROLS

The all new capacitive screen gives smartphone-like response, while remaining clearer and crisper than ever before. Physical buttons for key functions and steering wheel controls make it easy to remain in control while driving. Voice activation controls are now easy to access and dual microphones mean your voice can be captured no matter the terrain. The customizable interface allows you to tune not only your favourite radio stations, but also your favourite apps and shortcuts.

MULTI ANGLE REVERSING CAMERA

Shift into reverse and the multi angle camera automatically displays one of three rear views on the all new 7" screen. Easily switch between an astounding 180° normal view, wide view or handy top down view. Static parking aid lines help guide you into the tightest of spaces. Reverse audio control can be switched on to automatically mute the stereo making it that much easier to focus.

LONG MODE

UTILITY MODE

TALL MODE

MAGIC SEATS

Honda's Magic seats are a testimony to the very best in ingenious design. The back seats don't merely fold down, they can flip up as well, resulting in 18 possible configurations for transporting almost anything.

REFRESH MODE

For an even more spacious layout. After removing the head rests and moving the front seats forward, the back seat can be tilted down to form a bed like layout offering a comfy position to relax and refresh.

LONG MODE

A surfer's dream. The passenger seat folds down to fit in objects up to 2445 mm in length. An incredible innovation, creating even more freedom.

TALL MODE

Tall Mode is the first of the really astounding innovations. The back seats cleverly flip to give you the full advantage of the height of the car from the floor to the ceiling. That's over 1240 mm of height and a whole lot of options.

UTILITY MODE

The simplest configuration - where the back seats fold down like a regular hatch. But Honda's engineers solved a little problem here as well – the seats fold completely flat, so you can slide in a chest of drawers without it snagging on the seats. This creates a maximum 1845mm long flat floor.

18 CONFIGURATIONS

These are just the obvious combinations. Need to transport two bikes and a baby seat? Easy. How about two sets of golf clubs, three pieces of luggage and three passengers? No Problem. The Magic Seat system will change car interior space as you know it.
