

An Icon Returns.

Prelude

HONDA

Twenty-five years is a long
time to keep a promise.

A quarter of a century has passed since the Prelude last graced showrooms. That's a long time – but only if you measure it in human years.

For a legend like this, time works differently. Because the Prelude never really left. It lived in memories, in posters on bedroom walls and in dog-eared car magazines. It lived in the way people still talked about it. And that kind of feeling doesn't fade. It waits.

The new Prelude is patience personified. It's everything a driver's car can be when given the time, the care and the courage to be done properly. Refined not on a production line, but in the imagination of every person who ever said: **"they should bring that back"**.

They did.

Twenty-five years of waiting ends here.

Take a seat. The dream doesn't disappoint.

Prelude

Hybrid.

Two motors. One soul.

Some cars are made to move you from place to place. The Prelude was made to move you from within. We brought it back because some things shouldn't disappear. But this time, something's different.

Two electric motors.

A hybrid heart beating inside an iconic body. 135 kilowatts of power drawn from Honda's e:HEV hybrid system and our most advanced powertrain, wrapped in hardware born on the track. It seamlessly switches between electric, hybrid and engine modes to deliver instant torque, smooth performance and outstanding efficiency.

More capable than ever. Still unmistakably Prelude. A sophisticated coupe with a unique personality and a timeless design that's as exciting to drive as it looks.

Hybrid

e:HEV

Hybrid.

Prelude

Efficient by design. Exciting by nature.

The new Prelude is a hybrid sports car like we haven't seen before. With its two-motor system that sips fuel rather than gulps it, you're naturally left with more time to cruise and less time at the pump. Zero time at the plug, too.

That's because Honda's intelligent e-HEV system does the work for you – capturing energy under braking and deceleration to continuously top up the battery as you drive. So every deceleration sets up your next surge of acceleration. The system works hardest precisely when you're thinking about it least. For more kilometres with fewer stops.

And a drive that never lets efficiency get in the way of excitement.

FUEL EFFICIENCY¹
4.2 L/100KM

¹The figures quoted are based on J-WLTC combined test results. You may experience different results depending on driving conditions and the condition of the vehicle.

Performance.

Performance you're part of with S+ Shift²

The Prelude doesn't just perform, it communicates. Every input answered. Every demand met. From the moment you select your driving mode, the car is already in conversation with you. Comfort, GT, Sport, or Individual mode, the Prelude shapes itself around you, not the other way around. And then you move.

Honda's S+ Shift technology² transforms the instant surge of full hybrid acceleration into something you can see, hear and feel. The precisely timed gear changes build a rhythm that feels earned rather than automated.

Reach for the shift paddles and S+ Shift² comes alive, transforming the transmission into a virtual eight-speed gearbox that mirrors the precision and character of a manual, drawing you deeper into the driving experience.

The engine note rises and falls with every input, a performance soundtrack that tells you exactly what the car is doing and why.

²S+ Shift is unavailable when Adaptive Cruise Control (ACC) is in use.

Prelude

S + Shift

Flush door handles

Preserving the Prelude's sleek silhouette, illuminated flush door handles give a cleaner, more sculpted profile that feels modern and unmistakably sporty.

Prelude

Some shapes stop you mid-sentence...

With a silhouette that looks fast standing still, the Prelude has an unmistakable long, low stance. Its sweeping roofline drops into a fastback that feels like it couldn't have been drawn any other way. Smooth curves flow into sculpted lines...

And then night falls.

Across the rear, a full width horizontal light bar stretches from edge to edge. It's not a detail, it's a statement. A signature that announces the Prelude from a block away and lingers in your mirrors long after it's gone. The Prelude doesn't demand your attention. It simply has it.

Prelude

Prelude

H O N D A

Prelude

Prelude

Prelude

Interior.

GT comfort & style.

The body-hugging leather-appointed³ front seats are built for comfort on long drives. Meanwhile the perfectly contoured 'D' shaped steering wheel hints at the car's GT pedigree.

Its 10.2" digital driver's display ensures essential driver information is easily visible, while features like the wireless charging pad add everyday convenience. Meanwhile, soft-touch materials and distinctive flourishes like bi-colour make this a very enjoyable place to be.

³ Leather-appointed means (1) some parts of the seats may contain non-leather materials and (2) some seats may contain no leather material.

Just say “Hey Google”...

With Google Built-In⁵, your car becomes a digital personal assistant that's ready whenever you are. Operated via your Google account, you can stay connected to your car wherever you are. While inside the cabin your experience is entirely untethered and hands-free, with voice-controlled navigation, calls, music, messages, calendar and cabin settings. You can even manage compatible smart home devices from the driver's seat, letting your day flow smoothly before, during and after every drive.

BOSE Premium Sound System⁴

The Prelude's premium 8-speaker BOSE⁴ sound system features BOSE Dynamic Speed Compensation; as the car speeds up and exterior noise increases, the audio system automatically raises the music's volume and then lowers it as the car slows down. (If so desired, this feature can be deactivated at any time.)

⁴Bose is a registered trademark of Bose Corporation.

⁵Google, Android, Google Play, Google Maps and other marks are trademarks of Google LLC. Some Google Built-In features require an internet connection for the display audio to get connected, and it can be through Hotspot. For USB connections: Compatible Android phone and compatible active data plan required. For wireless connections: Wireless use of Android Auto requires a compatible Android 11.0+ phone and compatible active data plan. Check g.co/androidauto/requirements for compatibility.

Prelude

Honda
CONNECT

Your Prelude in your pocket.

Honda Connect Gen2⁶ delivers one of the most comprehensive connected suites on the road. You can now control your car from your phone, featuring remote locking, location tracking and remote engine immobilisation functions.

⁶ You must keep your physical key and mobile phone in the vehicle while driving. The engine will not start if your mobile device is out of battery, has no internet connection or is not inside the vehicle. Some Honda Connect app features are only available if your vehicle is linked to your Honda Connect account and connected services is activated. Remote vehicle features vary by model and not all vehicles will have all features.

⁷ Automatic collision detection is unavailable where there is no telecommunications network coverage, and may be unavailable during system maintenance or unplanned interruptions. This feature should not be relied on in the event of an emergency.

Remote Engine Immobiliser

Gives you the ability to remotely immobilise your car to provide added peace of mind.

Remote Climate Control

Prepare your Prelude in advance with remote climate control. Remotely set your ambient temperature on your Honda Connect smartphone app to keep you and your passengers comfortable as soon as you step inside.

Remote Lights On/Off

Never lose your car in a parking lot. With Honda Connect, you can remotely interact with your vehicle and locate your car by flashing your headlights and taillights until you find your Honda.

Remote Lock/Unlock⁶

Worried you forgot to lock up? Does a passenger need access, but they don't have a key? With Honda Connect, you can remotely lock or unlock your Honda with a simple tap on your smartphone.

Automatic Collision Detection⁷

In the event of airbag deployment, a notification will get sent promptly to the device logged into Honda Connect. The app will also alert a Honda Connect Customer Care agent, who will call the Honda Connect user and dispatch emergency services to the location if there's no response.

Prelude

Honda SENSING

Safety that sees more.

Honda SENSING[®] delivers a suite of intelligent driver assist features that work quietly and intuitively to help keep you safe and aware, without disrupting your driving experience. From tight parking to sudden traffic changes and busy freeways, it offers confidence boosting support without interrupting your drive.

A top-down view of a red car on a road. To the left, a speed limit sign with the number '40' is shown. Blue curved lines representing sensor waves emanate from the front of the car, extending towards the sign.

40

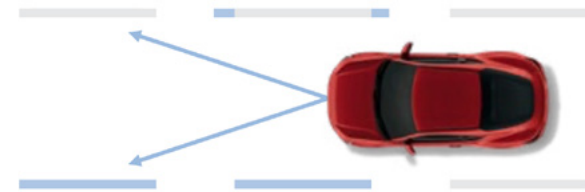

Traffic Sign Recognition System

Reminds you of certain road sign information such as the current speed limit your vehicle has just passed through, showing it on the gauge.

Traffic Jam Assist

Works in conjunction with the Lane Keep Assist System (LKAS) to apply steering torque, keeping your vehicle centred in lane during heavy traffic.

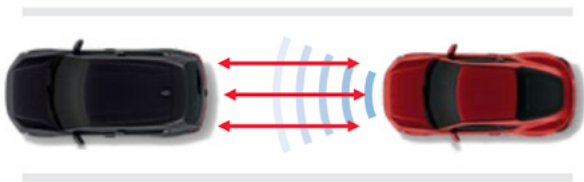

Lane Keep Assist System

Provides steering input to help keep the vehicle in the middle of a detected lane and provides audible and visual alerts if the vehicle is detected drifting out of its lane.

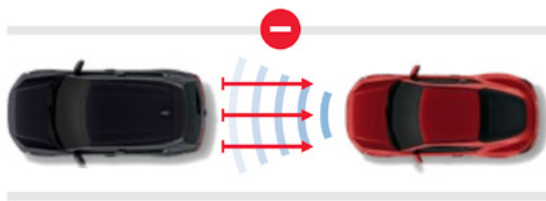

[®] Honda SENSING is driver-assist technology. Drivers must continue to drive safe and monitor the road and not rely on technology. Accuracy and operation of Honda SENSING may vary based on weather, speed, traffic, road conditions, markings and other factors. Refer to owner's manual.

Prelude

Adaptive Cruise Control with Low Speed Follow

Helps maintain a constant vehicle speed and a set following interval behind a vehicle detected ahead of yours and, if the detected vehicle comes to a stop, can decelerate and stop your vehicle.

Collision Mitigation Braking System

CMBS is designed to alert you when a potential front collision is determined, as well as to reduce your vehicle speed to help minimise collision severity when a collision is deemed unavoidable.

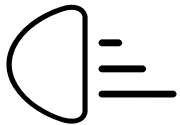

Road Departure Mitigation System

Alerts and helps to assist you when the system detects a possibility of your vehicle unintentionally crossing over detected lane markings, or approaching the outer edge of the road surface or a detected oncoming vehicle.

Adaptive Headlights.

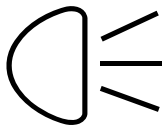

Headlights that adapt.

Night driving is easier with two clever features at work:

Adaptive Driving Beam

Uses automatic headlight beam switching technology. When oncoming traffic is detected, the beam on that side dims, while the other side stays on to keep the road ahead brightly illuminated.

High-Beam Support System

Automatically changes your headlights from low to high on a clear road, and back when an oncoming vehicle is detected. Together, they create a safer and more relaxed drive after dark, so you can focus on the road.

Prelude

Prelude

Colour Lineup.

Find your shade.

A car this considered deserves a colour to match. The Prelude is available in five carefully curated finishes, each chosen to complement its sleek, sculpted lines and reinforce the character within.

Five finishes.

One Prelude.

Prelude

Prelude

The best price, wherever you go.

No shopping around, no price to beat and no haggling. Just the best price, whichever Honda Dealer you buy from. A purchase wrapped in total confidence is our Honda Price Promise⁹ to you.

⁹Honda New Zealand's Price Promise policy applies exclusively to the retail purchase price of new Honda vehicles purchased through authorised Honda stores and ensures consistent national pricing for all standard retail customers. This policy does not apply to Commercial or Government fleet customers, who instead qualify for Honda New Zealand's fleet pricing program. Any such pricing variations are at the sole discretion of HNZ and its authorised agents.

Honda makes finance easy.

Whether you prefer to work with us in-store, over the phone, or online, Honda Financial Services¹⁰ is your comprehensive one-stop solution for personal and company leasing or financing — proudly supported by our long-term partners, UDC and MTF Finance.

HONDA
Financial Services

¹⁰ With Honda Financial Services, owning your new Prelude is simple and flexible. A range of tailored finance and lease options are available through your local Honda dealership, with our team ready to guide you through the process and find a solution that suits your needs. Whether you prefer structured repayments or greater flexibility, Honda Financial Services makes it easier to get behind the wheel with confidence. Terms and conditions apply.
