— Introducing the new 2026 —

CR-V Range

Just when you thought the ever-popular Honda CR-V had run out of boxes to tick, we've gone and raised the bar. Introducing the 2026 Honda CR-V range – reimagined to be sleeker, more refined, more versatile than ever before.

Designed for families who expect more from their SUV, the 2026 CR-V adapts effortlessly to every season of life. From family weekends away and outdoor adventures to those everyday drop-offs and pick-ups, this all-rounder is ready for whatever your lifestyle throws at it.

We've dreamed the impossible and made the best even better.

NEW RANGE, UNLIMITED POSSIBILITIES

New and improved for 2026, the Honda CR-V range now includes the CR-V Hybrid RS AWD – a sleek hybrid with an all-wheel drive train, Honda's latest e:HEV technology and new sporty RS styling. Also included in the 2026 CR-V lineup are a 2WD Hybrid, 4WD Petrol, and 2WD Petrol.

Packed with features to enhance the joy of driving, every new CR-V model comes with Honda Sensing for next-level safety, Honda Connect for fingertip control, plus the versatility and space CR-V is renowned for.

WHERE COMFORT MEETS CUTTING EDGE

The CR-V is the perfect marriage of comfort and innovation. Across both Hybrid X and RS AWD versions a redesigned centre gear console brings added functionality, while on the RS AWD new RS badging and red stitching matching the steering wheel gives a distinctly sport finish. Both AWD models feature leather appointed seats, with 2WD versions featuring hardwearing fabric upholstery.

Further attention to detail is applied with touches like the blacked-out roof lining, new sporty black trims throughout the cabin and ambient lighting around doors and cupholders in the RS AWD model. There also is a new 10.2-inch digital driver's display available across all variants excluding the CR-V X, to keep information front and centre.

For the CR-V Hybrid RS AWD specifically, maximum comfort in all weathers is prioritised with heated seating throughout and a heated steering wheel, along with ventilated front seats for cooling. This is complemented by a new heads-up display on the windscreen that provides immediate alerts without diverting your attention from the road.

SPORTY SOPHISTICATION

Across the range, the exteriors have been elevated to reflect a new modern and sleek aesthetic. The exterior of the CR-V Hybrid RS AWD takes the styling up a notch with rear privacy glass and new outer handles, front lower bumper and lower garnish all in elegant Piano Black.

Dynamic RS branding, sports bumpers on both ends and a more aerodynamic hood make the CR-V Hybrid RS AWD a dream performance machine. Sporty looks are complemented by well-considered extras like dual exhaust pipe finishers, roof rails, hands-free power tailgate with walk-away close function, Piano Black shark fin antenna, door mirrors and pillars, and automatic dusk-Sensing LED headlights with adaptive driving beam. Newly designed 19" full-black alloy wheels are complemented by body colour wheel arches to add a final flourish.

The rest of the range has been given similar embellishments with changes to alloys, dual-exhaust pipe finishers (in the Hybrid RS AWD and Hybrid X), new look front lower bumpers and lower garnishes and more.

HYBRID VARIANTS

Beneath the sharp, sporty exterior, sits a racy 2.0L DI Engine, 2-Motor Hybrid System and intelligent e-CVT transmission that produces 135kW of power and 335Nm of torque. Honda's latest e:HEV hybrid performance is elevated even further with the addition of an AWD hybrid variant (CR-V Hybrid RS AWD), delivering confident capability and control in every season.

PETROL VARIANTS

At the heart of the CR-V petrol variant lies a 1.5L VTEC Turbo engine that produces 140kW of power and 240Nm of torque. This is paired with Honda's AWD (on the CR-V L AWD variant), delivering power to where it's needed most. With perfectly placed paddle shifters, the CR-V petrol range makes performance easier and safer.

PEACE OF MIND WITH HONDA CONNECT.

Honda Connect is a new app that allows you to connect to your car like never before. With just a few taps, you can turn the lights on and off, remotely lock the doors, adjust the climate control, geo-locate your car and even check your fuel level. What's more, in the event of a collision Honda Connect can detect airbag deployment and immediately alert the Honda Connect Call Centre. Available across the 2026 CR-V range, Honda Connect is free for the first three years, after which a subscription charge will apply.

MADE FOR THOSE WHO DREAM BIG

When it comes to space, the CR-V offers all the room you could need. Easily seating five, with generous legroom in the back, 32 degrees of reclining angle and a sliding second row, all your passengers get to travel in comfort. And with an impressive 589L rear capacity (581L in the Hybrid RS AWD and Hybrid X), there's space to fit everyone's adventures and more.

IMPROVED INTUITIVE TECHNOLOGY

The CR-V range is fitted with Honda's latest Advanced Display Audio Infotainment System – now with Google Built-In services (including Google Maps and Google Assistant). The 9-inch touchscreen infotainment system combines Apple CarPlay™, Android Auto™ and – new for 2026 – a 360 degree camera for effortless, confident parking on both the CR-V Hybrid RS AWD and CR-V L AWD.

Smart KeyCard technology and the Honda Sensing Suite ensures a smoother and safer driving experience. Seamless tech keeps more of the things you love like music, friends and your favourite destinations within easy reach. Keep connected while remaining focused on the road ahead with steering-wheel-mounted controls and wireless charging for your phone. Plus, the CR-V Hybrid RS AWD features a 12-Speaker Bose® Premium Sound System with Subwoofer so you can drive to your own beat.

SAFETY REDEFINED

The new CR-V Range comes equipped with an enhanced Honda Sensing Suite, offering some of the most advanced safety technologies available today. These tools are designed to assist the driver's situational awareness and, in some cases, intervene to avoid a collision or lessen its severity. These include:

- » Adaptive Cruise Control (ACC)
- » Low Speed Follow (LSF)
- » Collision Mitigation Braking System (CMBS)
- » Forward Collision Warning (FCW)
 - Integrated with CMBS
- » Lane Departure Warning (LDW)
 - Integrated with RDM
- » Lane Keep Assist System (LKAS)
- » Traffic Jam Assist (TJA)
- » Road Departure Mitigation (RDM)
- » Auto High-Beam Support System (HSS) (CR-V Hybrid RS Only)
- » Rear Cross Traffic Alert (RCTA)
- » Adaptive Driving Beam (CR-V Hybrid RS Only)
- » Speed Recognition Function
- » Post-collision braking
